

Braun Alpha Spreader/Feeders maximize the productivity of your flatwork area. Available in two model sizes, there is an Alpha available to meet your specific production needs. With fewer moving parts, a cableless spreading mechanism and rugged design and construction, Braun Alphas meet your needs for reliability and repeated high performance. The Alpha's microprocessor ensures precision spreading and feeding, with each piece accurately squared and centered. The lay-down process is carried out at the same speed as the feed belts, and an air assist completes the feed process for the highest quality leading edge. That edge leads directly to a superior finish, with wrinkles ironed out, not in.

The Alpha Series consistently delivers high quality output for operators with minimal training. Even new workers will quickly realize outstanding results. For reliability, performance and a better finished product, depend on Braun Alpha Series Spreader/Feeders.

# Alpha Series

SPREADER/FEEDERS

## Alpha Series Spreader/Feeders

### Braun Alpha 1200

The Braun Alpha 1200 is the most versatile spreader/feeder in the industry providing high quality output with extreme labor efficiency. The versatility provides sheet feeding, table linens and small piece feeding all in one machine.

The Alpha 1200 can be ordered with 2,3 or 4 feed stations depending on production needs.

### Standard Features

- Bilingual control display (English/Spanish).
- Microprocessor control capable of holding in excess of 75 programs.
- Access for feeding small pieces to the ironer without moving the Spreader/Feeder.
- Resettable production counters.
- Inverter conveyor drive with speed indicator.
- Wired for and easily adaptable to the Braun ARC quality control unit.
- 24V DC solid state circuitry with troubleshooting capability.
- Caster-mounted for easy movement.
- Memory card for program back up.

### Specifications

Type	Model Number	No. Feed Stations	Shipping Weight lb (kg)	Shipping Dimensions (l x w x h) in (l x w x h) mm
Alpha 1200 Series	MP4SSF	2, 3, 4	3,200 (1452)	150 x 72 x 90 3810 x 1830 x 2285
Alpha 1800 Series	TP4SSF	4	5,250 (2381)	162 x 96 x 102 4115 x 2440 x 2590

### Braun Alpha 1800

The Braun Alpha 1800 leads the industry in high volume processing with exceptional product quality results. Equipped with four feed stations and a dual spreading head, the Alpha 1800 can overlap flatwork at speeds of up to 180 FPM under the precise control of the Braun microprocessor

All Braun Alpha series spreader/feeders require minimal operator training.

- Ethernet ready.
- Leading edge accelerator.
- Will network with Delta-Net Control System.
- Independent operation of feeding stations.
- Cableless spreading mechanism.

### Optional Features

- Resettable production counters at each feed station.
- Production lights (with B+R controls only).
- ARC (automatic reject computer).
