# D'HOOGHE OPEN POCKET WASHER EXTRACTORS

---

Models WE 570, WE 900 and WE 1250

WE 570

WE 1250

**JENSEN**®

**A compact solution for high-quality washing**

## D'HOOGHE open pocket washer extractors, models WE 570, WE 900 and WE 1250

- D'HOOGHE WE industrial washer extractors are among the most compact in the industry
  - The stainless steel outer shell is reinforced by a 25 mm thick steel plate together with heavy counter weights, enabling higher tolerances to unbalanced loads
  - The drum as well as all parts in contact with washing chemicals are made of stainless steel
  - The drum is supported by 2 industrial oversized adjustable conical bearings in order to ensure long years of trouble-free operation
  - Multiple shaft sealing combined with an air gap ensures a perfect protection against any leakage and enhances significantly the bearing's life
  - A heavy-duty industrial construction with metal springs on the top (except WE 570: at the bottom) and hydraulic shock absorbers at the bottom ensures a vibration-free extraction for all linen classifications.
- No special foundations are required

- A large loading door with pneumatic operated lock, allows quick loading and unloading
- Pneumatic operated inlet valve, drain valve, soap product containers and brake for trouble-free operation

WE 570

- All vital electronic and electrical components are located in a separate moist-free control box
- Standard direct steam heating or optional electric heating 48/60 kW (WE 570 only)
- Standard frequency controlled drive motor installed on top of the outer shell results in a smooth operation, a very low noise level and minimal long-term maintenance
- Standard 5 product containers and soap printboard for up to 6 liquid dosing pumps
- Standard PS 40 microprocessor with 30 freely programmable cycles through the keypad
- All models available with complete water recovery system (optional)
- WE 900-1250 models are available in TILTING (forward/backwards) versions (optional).

### Installation

To ensure correct performance, installation should be carried out by an authorized JENSEN distributor or a JENSEN engineer.

### Service

JENSEN provides backup service through a worldwide network of highly qualified distributors, all with their own maintenance and spare parts services.

### Call us ...

JENSEN provides a complete range of equipment to the heavy-duty laundries, delivered and installed according to your specifications. Please do not hesitate to contact us for further advice and information, e.g. by paying us a visit at [www.jensen-group.com](http://www.jensen-group.com)

We reserve the right to change technical data and manufacturing details as part of our ongoing product improvement.
